New Nokia Phone Perfect for Music Lovers

ACS recently launched the Nokia 3606 Music phone. The ultra slim, smooth-back, flip-style phone is perfect for music lovers with its external music control keys and built-in FM radio.

"The Nokia 3606 makes downloading easy. With 8GB of storage users can quickly download games, wallpaper, ringtones, music and applications," said Jens Laipenieks, ACS wireless product manager.

Customers will love its sleek look and features, such as the touch-activated external music control keys and 1.3 megapixel camera.

Check out www.acsalaska.com for pricing details and special offerings.

ACS Recycles

125 million phones will end up in a landfill this year releasing toxic materials into our earth and groundwater. Every one of the discarded phones is almost 100% recyclable. Recycling your old phone contributes to the well-being of our planet.

- Cell phones are almost 100% recyclable.
- Metal and plastic from recycled cell phones can be reused to create other products.
- Currently 125 million cell phones end up in landfills each year.

ACS has recycled over 3,000 phones during 2009. Go to acsalaskarecycles.com for more details about handset recycling or other green efforts at ACS.

Using BREW

What is BREW™? BREW is like a shopping cart for your phone. It allows you to download and install thousands of applications—like ringtones, games, news and more—directly over your handset.

All you need to do to access BREW™ is add one of the ACS Data Packs. Then look for BREW™ in your phone's menu. All phones are different, but they all have a menu button to access your phones' settings and features.
